| **Framework/Library** | : | Angular 2/6/7/9/11/15/18, Bootstrap 4/5 **Web Designing** |
| **Web Designing** | : | HTML/HTML5, CSS/CSS3, SCSS **Code** |
| **Repository** | : | Git, GitHub |
| **IDE** | : | Visual Studio Code |

## PROJECT DETAILS

| Project | **CStoreBO** |
|---|---|
| **Project Description** | CStoreBO is an US based project. And it is intermediate in between CRM and fuel station to update daily product price and offers. It is wrap up of CRM. and back-office application for fuel station or gas station management.<br>In CStoreBO, we have developed a web application by using Angular 6 and MVC .NET. By using Angular 6 we have improved the performance of application which was our main task. This project was mainly built for developed countries where Gas stations and shops operates automatically using the systems with less human resources. |
| **Company** | Arnav Technosys |
| **Client** | Adv Back-office (US Client) |
| **Role** | Angular Developer |
| **Responsibilities** | Understanding business requirements.<br>Low Level Design Document.<br>Designing web pages.<br>Working on the change request. |
| **Team Size** | 10 |
| **Technologies** | Angular 6, HTML, CSS, Bootstrap 4, Angular Material |

| IDE and Tools | Visual Studio Code |
|---|---|

| Project | **Carsparc** |
|---|---|
| Project Description | The aim of the project is to provide the car services which will be affordable to user. Also, it is beneficial for the Service center as it helps to bring more customers to be the part of that center. |
| Company | Arnav Technosys |
| Client | Product |
| Role | Angular Developer |
| Responsibilities | Understanding business requirements.<br>Low Level Design Document.<br>Designing web pages.<br>Working on the change request. |
| Team Size | 7 |
| Technologies | Angular 7, HTML, CSS, Bootstrap 4 |
| IDE and Tools | Visual Studio Code |

| Project | **Product Cost Optimization Platform (PCOP)** |
|---|---|
| Project Description | PCOP is an Infosys product. Earlier SME used to generate clean sheets for various parts by using CAD and Excel. Which was tedious and time-consuming process. We worked on optimizing the tool to make it more robust and efficient by using VB.net to capture CAD data and storing in MongoDB for back-end we used Java Spring and Angular 9 for the front end. In this project we worked in the agile methodology using Scrum framework. Where my role is development of the UI components and design. |
| Company | Infosys |
| Client | Product |
| Role | Angular Developer |
| Responsibilities | Understanding business requirements.<br>Gathering Client Requirement.<br>Designing Web Pages.<br>Working on the change request. |
| Team Size | 5 |
| Technologies | Angular 9, HTML, CSS, Bootstrap 4, Nebular Component |
| IDE and Tools | Visual Studio Code |

| Project | **IRENO Nerve Center** |
|---|---|
| Project Description | IRENO is a product of Con Edison. One stop solution for all utilities related sectors. Currently we have added 7 sector like Head End System, Meter Data Management System, Assets Management System, Reconciliation, Exceptions, Renewables and Distributed Energy Resources, Power Bank etc. Main USP of project is Storm Management. |
| Company | Cognizant |
| Client | Con Edison Product |

| Role | UI/Angular Developer |
|---|---|
| Responsibilities | Understanding business requirements.<br>Gathering Client Requirement.<br>Designing Complex Web Pages.<br>Working on the change request.<br>R&D on storm, weather forecast. |
| Team Size | 14 |
| Technologies | Angular 15, HTML5, CSS3, Angular-Material, Bootstrap 5 etc. |
| IDE and Tools | Visual Studio Code |
